

REDEVELOPMENT PROJECT PROFILE

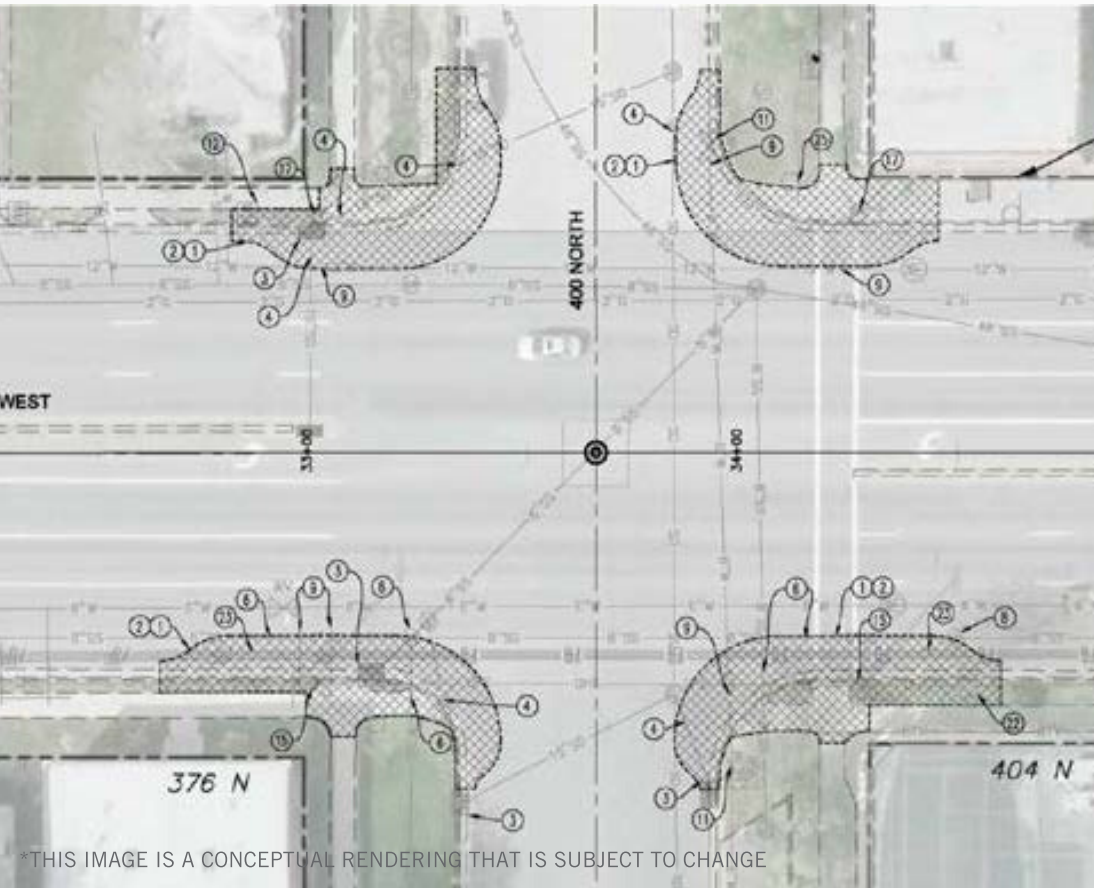

300 WEST STREETSCAPE IMPROVEMENTS

VISION

A MORE WALKABLE
WEST CAPITOL HILL

Originally designed and estimated as a single phase, the 300 West Streetscape Project has since been broken out into two construction phases. Phase One construction was completed in 2014, with the current Phase Two encompassing a broader scope of infrastructure improvements to the West Capitol Hill thoroughfare.

In addition to upgrading infrastructure, the project will create a more pedestrian-friendly environment along 300 West with the addition of improved pedestrian crossings, curb extensions, traffic-calming features, landscaping, and street trees near the northern end of the project site.
